Datafusion Systems

We specialise in giving our customers clear, honest and accurate engineering and management advice.

If your organisation:

- has a technical or engineering-management problem
- is not sure who to believe or where to turn for unbiased advice
- needs to make multiple software/hardware systems communicate
- requires an innovative solution to an engineering problem

...why not ask us if we can assist?

Our mission is to keep our customers happy and make our technology transparent.

Datafusion provides services in many areas including:

Engineering Services

- Software and Hardware Engineering
- Unix and Real-time Systems
- Systems Integration
- Scientific Visualisation

Management Services

- Management Consulting
- Requirements Gathering/Documentation
- Independent Corporate Reviews
- Software Engineering Process Improvement
- Developing Tender Requirements
- Source Code Management
- Data Mining and Scientific Visualisation

Due to the broad nature of our service base we suggest you contact us with your specific requirements.
